Subject Index

Volume 86, January 7–June 23, 2000

A

$\alpha_1\beta_3$

Bone Sialoprotein and the Paradox of Angiogenesis Versus Atherosclerosis, 827

A/T-rich region

Identification of *cis* Elements in the Cardiac Troponin T Gene Conferring Specific Expression in Cardiac Muscle of Transgenic Mice, 478

A_{2b} purinoceptor

Extracellular Adenosine Induces Apoptosis of Human Arterial Smooth Muscle Cells via A_{2b}-Purinoceptor, 76

Acceptance rate

Under New Management: A Six-Month Progress Report on *Circulation Research*, 111

Acetylcholine

Impaired Conduction of Vasodilation Along Arterioles in Connexin40-Deficient Mice, 649

Acid-base

Opposite Effects of Pressurized Steady Versus Pulsatile Perfusion on Vascular Endothelial Cell Cytosolic pH: Role of Tyrosine Kinase and Mitogen-Activated Protein Kinase Signaling, 1230

Acidosis

Acidosis Inhibits Endothelial Cell Apoptosis and Function and Induces Basic Fibroblast Growth Factor and Vascular Endothelial Growth Factor Expression, 312

Vascular Endothelial Growth Factor: A Jack-of-All-Trades or a Nonspecific Stress Gene?, 251

Actin

Redox Changes of Cultured Endothelial Cells and Actin Dynamics, 549

Temporal Events Underlying Arterial Remodeling After Chronic Flow Reduction in Mice: Correlation of Structural Changes With a Deficit in Basal Nitric Oxide Synthesis, 1160

Vascular Endothelial Growth Factor–Stimulated Actin Reorganization and Migration of Endothelial Cells Is Regulated via the Serine/Threonine Kinase Akt, 892

Action potential

Ca²⁺ Transients and Ca²⁺ Waves in Purkinje Cells: Role in Action Potential Initiation, 448

Changes in Ca²⁺ Cycling Proteins Underlie Cardiac Action Potential Prolongation in a Pressure-Overloaded Guinea Pig Model With Cardiac Hypertrophy and Failure, 558

Enhanced Dispersion of Repolarization and Refractoriness in Transgenic Mouse Hearts Promotes Reentrant Ventricular Tachycardia, 396

A Novel Anionic Inward Rectifier in Native Cardiac Myocytes, e63

Action potential foot

Effects of Cardiac Microstructure on Propagating Electrical Waveforms, e23

Influence of a Perfusing Bath on the Foot of the Cardiac Action Potential, e19

Activator protein-1

Allele-Specific Regulation of Matrix Metalloproteinase-12 Gene Activity Is Associated With Coronary Artery Luminal Dimensions in Diabetic Patients With Manifest Coronary Artery Disease, 998

Adenosine

Adenosine A₁ Receptor Induced Delayed Preconditioning in Rabbits: Induction of p38 Mitogen-Activated Protein Kinase Activation and Hsp27 Phosphorylation via a Tyrosine Kinase- and Protein Kinase C–Dependent Mechanism, 989

Extracellular Adenosine Induces Apoptosis of Human Arterial Smooth Muscle Cells via A_{2b}-Purinoceptor, 76

Relation Between Renal Interstitial ATP Concentrations and Autoregulation-Mediated Changes in Renal Vascular Resistance, 656

Adenosine receptors

Overexpressed A₁ Adenosine Receptors Reduce Activation of Acetylcholine-Sensitive K⁺ Current by Native Muscarinic M₂ Receptors in Rat Atrial Myocytes, 643

Adenovirus

Ca²⁺ Channel Modulation by Recombinant Auxiliary β Subunits Expressed in Young Adult Heart Cells, 175

Gene Therapy for Restenosis, 829

Human Gene Therapy: The Good, the Bad, and the Ugly, 923

Viral Myocarditis: Receptors That Bridge the Cardiovascular With the Immune System?, 253

Adenylate cyclase

Connections Count: Excitation-Contraction Meets Excitation-Transcription Coupling, 717

Adenyllyl cyclase

Enhanced Cardiac Function in Transgenic Mice Expressing a Ca²⁺-Stimulated Adenyllyl Cyclase, 795

Adhesion

Human Vascular Adhesion Protein-1 (VAP-1) Plays a Critical Role in Lymphocyte–Endothelial Cell Adhesion Cascade Under Shear, 1245

Adhesion molecules

Reduced Neointima Hyperplasia of Vein Bypass Grafts in Interleukin Adhesion Molecule-1-Deficient Mice, 434

ADP-ribose

ADP-Ribosyl Cyclase in Rat Vascular Smooth Muscle Cells: Properties and Regulation, 1153

Adrenergic

Coupling Function of Endogenous α_1 - and β -Adrenergic Receptors in Mouse Cardiomyocytes, 1047

β -Adrenergic agonist

Mysteries of Magnesium Homeostasis, 245

β -Adrenergic receptors

Determinants of the Cardiomyopathic Phenotype in Chimeric Mice Overexpressing Cardiac Gs α , 802

Polymorphisms of the β_2 -Adrenergic Receptor Determine Exercise Capacity in Patients With Heart Failure, 834

Adrenergic receptors, α_1

Hybrid Transgenic Mice Reveal In Vivo Specificity of G Protein-Coupled Receptor Kinases in the Heart, 43

β -Adrenergic stimulation

Microtubule Disruption Modulates Ca²⁺ Signaling in Rat Cardiac Myocytes, 30

Advanced glycosylation end products

Regulation of Endothelial Nitric Oxide Synthase Expression by Albumin-Derived Advanced Glycosylation End Products, e50

Allograft arteriopathy

cAMP Pulse During Preservation Inhibits the Late Development of Cardiac Isograft and Allograft Vasculopathy, 982

Angiogenesis

Bone Sialoprotein and the Paradox of Angiogenesis Versus Atherosclerosis, 827

Bone Sialoprotein Mediates Human Endothelial Cell Attachment and Migration and Promotes Angiogenesis, 885

Intussusceptive Angiogenesis: Its Role in Embryonic Vascular Network Formation, 286

Mice Lacking the Vascular Endothelial Growth Factor-B Gene (*Vegfb*) Have Smaller Hearts, Dysfunctional Coronary Vasculature, and Impaired Recovery From Cardiac Ischemia, e29

Nuclear Factor- κ B and cAMP Response Element Binding Protein Mediate Opposite Transcriptional Effects on the Flk-1/KDR Gene Promoter, e110

Vascular Endothelial Growth Factor–Stimulated Actin Reorganization and Migration of Endothelial Cells Is Regulated via the Serine/Threonine Kinase Akt, 892

Angiopoietin

Akt Takes Center Stage in Angiogenesis Signaling, 4

Angiopoietin-1

Angiopoietin-1 Induces Endothelial Cell Sprouting Through the Activation of Focal Adhesion Kinase and Plasmin Secretion, 952

Angiopoietin-1 Regulates Endothelial Cell Survival Through the Phosphatidylinositol 3-Kinase/Akt Signal Transduction Pathway, 24

Angiotensin

Angiotensin-Converting Enzyme Inhibitors Downregulate Tissue Factor Synthesis in Monocytes, 139

Effects of the Renin-Angiotensin System on the Current I_{to} in Epicardial and Endocardial Ventricular Myocytes From the Canine Heart, 1062

Interferon- γ Induces AT₂ Receptor Expression in Fibroblasts by Jak/STAT Pathway and Interferon Regulatory Factor-1, 233

Angiotensin II

β -Blockade Prevents Sustained Metalloproteinase Activation and Diastolic Stiffening Induced by Angiotensin II Combined With Evolving Cardiac Dysfunction, 807

Angiotensin II Activates Nuclear Transcription Factor κ B Through AT₁ and AT₂ in Vascular Smooth Muscle Cells: Molecular Mechanisms, 1266

Biphasic Actions of Prostaglandin E₂ on the Renal Afferent Arteriole: Role of EP₃ and EP₄ Receptors, 663

Coronary Microvascular Endothelial Cell Redox State in Left Ventricular Hypertrophy: The Role of Angiotensin II, 463

Cyclooxygenase-2 Is Required for Tumor Necrosis Factor- α - and Angiotensin II-Mediated Proliferation of Vascular Smooth Muscle Cells, 906

Cytokine Actions of Angiotensin II, 1187

Inability to Induce Hypertension in Normotensive Rat Expressing AT₁ Receptor Antisense, 1167

Stimulation of Myocardial Na⁺-Independent Cl⁻-HCO₃⁻ Exchanger by Angiotensin II Is Mediated by Endogenous Endothelin, 622

The Third Cytoplasmic Loop of the Angiotensin II Type 1 Receptor Exerts Differential Effects on Extracellular Signal-Regulated Kinase (ERK1/ERK2) and Apoptosis via Ras- and Rap1-Dependent Pathways, 729

Angiotensin type 1 receptor

Inability to Induce Hypertension in Normotensive Rat Expressing AT₁ Receptor Antisense, 1167

Animal models

β -Adrenergic Receptor Signaling: An Acute Compensatory Adjustment--Inappropriate for the Chronic Stress of Heart Failure? Insights from Gsa Overexpression and Other Genetically Engineered Animal Models, 502

Animals

Apoptosis and Heart Failure: A Critical Review of the Literature, 1107

Anion exchanger

Stimulation of Myocardial Na⁺-Independent Cl⁻-HCO₃⁻ Exchanger by Angiotensin II Is Mediated by Endogenous Endothelin, 622

Anisomycin

Ischemic Preconditioning Activates MAPKAPK2 in the Isolated Rabbit Heart: Evidence for Involvement of p38 MAPK, 144

Targeted Disruption of the Mouse *Sod 1* Gene Makes the Hearts Vulnerable to Ischemic Reperfusion Injury, 264

Anisotropic propagation

Electrophysiological Effects of Remodeling Cardiac Gap Junctions and Cell Size: Experimental and Model Studies of Normal Cardiac Growth, 302

Anisotropy

Effects of Cardiac Microstructure on Propagating Electrical Waveforms, e23

Influence of a Perfusing Bath on the Foot of the Cardiac Action Potential, e19

Remodeling of Gap Junctional Coupling in Hypertrophied Right Ventricles of Rats With Monocrotaline-Induced Pulmonary Hypertension, 871

Anoxia/reoxygenation

Postanoxic T Lymphocyte-Endothelial Cell Interactions Induce Tumor Necrosis Factor- α Production and Neutrophil Adhesion: Role of Very Late Antigen-4/Vascular Cell Adhesion Molecule-1, 1327

Antiarrhythmic agent

Anchors Aweigh! Ion Channels, Cytoskeletal Proteins, and Cellular Excitability, 367

Antibodies

ADP-Ribosyl Cyclase in Rat Vascular Smooth Muscle Cells: Properties and Regulation, 1153

Antioxidant

Direct Evidence for Increased Hydroxyl Radicals Originating From Superoxide in the Failing Myocardium, 152

Mitochondrial Oxidative Stress in Heart Failure: "Oxygen Wastage" Revisited, 119

Aorta

Pharmacological and Immunohistochemical Characterization of Calmodulin-Stimulated (Ca²⁺+Mg²⁺)-ATPase in Cultured Porcine Aortic Endothelial Cells, 191

Apolipoprotein B

Direct Visualization of Lipid Deposition and Reverse Lipid Transport in a Perfused Artery: Roles of VLDL and HDL, 768

Apoptosis

Acidosis Inhibits Endothelial Cell Apoptosis and Function and Induces Basic Fibroblast Growth Factor and Vascular Endothelial Growth Factor Expression, 312

Akt Takes Center Stage in Angiogenesis Signaling, 4

Angiopoietin-1 Regulates Endothelial Cell Survival Through the Phosphatidylinositol 3'-Kinase/Akt Signal Transduction Pathway, 24

Apoptosis and Heart Failure: A Critical Review of the Literature, 1107

Calcineurin-Mediated Hypertrophy Protects Cardiomyocytes From Apoptosis In Vitro and In Vivo: An Apoptosis-Independent Model of Dilated Heart Failure, 255

Cellular and Molecular Dissection of Reperfusion Injury: ROS Within and Without, 117

Death Receptors, Intimal Disease, and Gene Therapy: Are Therapies That Modify Cell Fate Moving too Fast?, 1009

Extracellular Adenosine Induces Apoptosis of Human Arterial Smooth Muscle Cells via A_{2b}-Purinoceptor, 76

Inhibition of Extracellular Signal-Regulated Kinase Enhances Ischemia/Reoxygenation-Induced Apoptosis in Cultured Cardiac Myocytes and Exaggerates Reperfusion Injury in Isolated Perfused Heart, 692

Role of Mitogen-Activated Protein Kinases in Ischemia and Reperfusion Injury: The Good and the Bad, 607

Sensitivity to Fas-Mediated Apoptosis Is Determined Below Receptor Level in Human Vascular Smooth Muscle Cells, 1038

Temporal Events Underlying Arterial Remodeling After Chronic Flow Reduction in Mice: Correlation of Structural Changes With a Deficit in Basal Nitric Oxide Synthesis, 1160

The Third Cytoplasmic Loop of the Angiotensin II Type 1 Receptor Exerts Differential Effects on Extracellular Signal-Regulated Kinase (ERK1/ERK2) and Apoptosis via Ras- and Rap1-Dependent Pathways, 729

Toward Antiapoptosis as a New Treatment Modality, 371

Arachidonic acid

Possible Mechanism(s) of Arachidonic Acid-Induced Intracellular Acidosis in Rat Cardiac Myocytes, e55

Arginine

Myocardial Glucose Uptake Is Regulated by Nitric Oxide via Endothelial Nitric Oxide Synthase in Langendorff Mouse Heart, 270

Arrhythmia

Calcium Waves: Physiological Relevance in Cardiac Function, 1016

Enhanced Dispersion of Repolarization and Refractoriness in Transgenic Mouse Hearts Promotes Reentrant Ventricular Tachycardia, 396

Gap Junctions in Cardiovascular Disease, 1193

High-Frequency Periodic Sources Underlie Ventricular Fibrillation in the Isolated Rabbit Heart, 86

Mechanism and Selectivity of the Effects of Halothane on Gap Junction Channel Function, e104

A Mechanism of Transition From Ventricular Fibrillation to Tachycardia: Effect of Calcium Channel Blockade on the Dynamics of Rotating Waves, 684

Arsenite

NADH Oxidase Activation Is Involved in Arsenite-Induced Oxidative DNA Damage in Human Vascular Smooth Muscle Cells, 514

Arterial smooth muscle

Coupling of Ca²⁺ to CREB Activation and Gene Expression in Intact Cerebral Arteries From Mouse: Roles of Ryanodine Receptors and Voltage-Dependent Ca²⁺ Channels, 760

Direct Visualization of Lipid Deposition and Reverse Lipid Transport in a Perfused Artery: Roles of VLDL and HDL, 768

Lipoprotein Effects on the Vessel Wall, 715

Local drug delivery

Arterial Paclitaxel Distribution and Deposition, 879

Long-QT syndrome

Abnormal Cardiac Na^+ Channel Properties and QT Heart Rate Adaptation in Neonatal Ankyrin α Knockout Mice, 441

Anchors Aweigh! Ion Channels, Cytoskeletal Proteins, and Cellular Excitability, 367

Novel Gain-of-Function Mechanism in K^+ Channel-Related Long-QT Syndrome: Altered Gating and Selectivity in the HERG1 N629D Mutant, 507

Two Distinct Congenital Arrhythmias Evoked by a Multidysfunctional Na^+ Channel, e91

LQT2

LQT2: Amplitude Reduction and Loss of Selectivity in the Tail That Wags the HERG Channel, 492

Lung transplantation

Antisense Intercellular Adhesion Molecule-1 (ICAM-1) Oligodeoxynucleotide Delivered During Organ Preservation Inhibits Post-transplant ICAM-1 Expression and Reduces Primary Lung Isograft Failure, 166

Lymphocytes

Lymphocyte Trafficking Mediated by Vascular Adhesion Protein-1: Implications for Immune Targeting and Cardiovascular Disease, 1190

Lysosome

Connexin Expression and Turnover: Implications for Cardiac Excitability, 723

M**Macrophage**

Hypercholesterolemia Causes Mechanical Weakening of Rabbit Atheroma: Local Collagen Loss as a Prerequisite of Plaque Rupture, 101

MAP kinase

Opposite Effects of Pressurized Steady Versus Pulsatile Perfusion on Vascular Endothelial Cell Cytosolic pH: Role of Tyrosine Kinase and Mitogen-Activated Protein Kinase Signaling, 1230

MAPKAPK2

Ischemic Preconditioning Activates MAPKAPK2 in the Isolated Rabbit Heart: Evidence for Involvement of p38 MAPK, 144

Targeted Disruption of the Mouse *Sod 1* Gene Makes the Hearts Vulnerable to Ischemic Reperfusion Injury, 264

Mapping

Enhanced Dispersion of Repolarization and Refractoriness in Transgenic Mouse Hearts Promotes Reentrant Ventricular Tachycardia, 396

Fibrillating Myocardium: Rabbit Warren or Beehive?, 369

High-Frequency Periodic Sources Underlie Ventricular Fibrillation in the Isolated Rabbit Heart, 86

Mast cell

Endothelin Receptor Antagonism Ameliorates Mast Cell Infiltration, Vascular Hypertrophy, and Epidermal Growth Factor Expression in Experimental Diabetes, 158

Matrix

Allele-Specific Regulation of Matrix Metalloproteinase-12 Gene Activity Is Associated With Coronary Artery Luminal Dimensions in Diabetic Patients With Manifest Coronary Artery Disease, 998

Matrix metalloproteinase

Interleukin-1 β and Tumor Necrosis Factor- α Decrease Collagen Synthesis and Increase Matrix Metalloproteinase Activity in Cardiac Fibroblasts In Vitro, 1259

Mechanical properties

Differential Expression of Cardiac Titin Isoforms and Modulation of Cellular Stiffness, 59

Mechanical strain

Stressing Rac, Ras, and Downstream Heat Shock Protein 70, 1101

Mechanical stress

Mechanical Stress-Induced Heat Shock Protein 70 Expression in Vascular Smooth Muscle Cells Is Regulated by Rac and Ras Small G Proteins but Not Mitogen-Activated Protein Kinases, 1122

Mechanotransduction

Lateral Zone of Cell-Cell Adhesion as the Major Fluid Shear Stress-Related Signal Transduction Site, 425

Rapid Displacement of Vimentin Intermediate Filaments in Living Endothelial Cells Exposed to Flow, 745

Metabolism

Effects of Hypoxia on Isometric Force, Intracellular Ca^{2+} , pH, and Energetics in Porcine Coronary Artery, 862

Metabolic Mechanisms Associated With Antianginal Therapy, 487

Metalloproteinase-12

Allele-Specific Regulation of Matrix Metalloproteinase-12 Gene Activity Is Associated With Coronary Artery Luminal Dimensions in Diabetic Patients With Manifest Coronary Artery Disease, 998

Metalloproteinases

β -Blockade Prevents Sustained Metalloproteinase Activation and Diastolic Stiffening Induced by Angiotensin II Combined With Evolving Cardiac Dysfunction, 807

Photodynamic Therapy Generates a Matrix Barrier to Invasive Vascular Cell Migration, 334

Mg $^{2+}$

Parallel Stimulation of Glucose and Mg^{2+} Accumulation by Insulin in Rat Hearts and Cardiac Ventricular Myocytes, 326

MgADP

Effects of MgADP on Length Dependence of Tension Generation in Skinned Rat Cardiac Muscle, e1

Mibefradil

T-Type and Tetrodotoxin-Sensitive Ca^{2+} Currents Coexist in Guinea Pig Ventricular Myocytes and Are Both Blocked by Mibefradil, 628

Mice

Cardiac Dysfunction Caused by Myocardium-Specific Expression of a Mutant Thyroid Hormone Receptor, 700

Myocardial Glucose Uptake Is Regulated by Nitric Oxide via Endothelial Nitric Oxide Synthase in Langendorff Mouse Heart, 270

Reduced Neointima Hyperplasia of Vein Bypass Grafts in Intercellular Adhesion Molecule-1-Deficient Mice, 434

Senescence

Phenotypic and Functional Changes in Regenerated Porcine Coronary Endothelial Cells: Increased Uptake of Modified LDL and Reduced Production of NO, 854

Sensor

Making Sense out of Oxygen Sensor, 824

Sepsis

Increased Microvascular Reactivity and Improved Mortality in Septic Mice Lacking Inducible Nitric Oxide Synthase, 774

SERCA2

Mechanism of Doxorubicin-Induced Inhibition of Sarcoplasmic Reticulum Ca²⁺-ATPase Gene Transcription, 8

Serum response factor

Smooth Muscle α -Actin CArG Elements Coordinate Formation of a Smooth Muscle Cell-Selective, Serum Response Factor-Containing Activation Complex, 221

Shear stress

Laminar Shear Stress Inhibits Vascular Endothelial Cell Proliferation by Inducing Cyclin-Dependent Kinase Inhibitor p21^{Sdi1/Cip1/Waf1}, 185

Effect of Platelet-Derived Growth Factor Receptor- α and - β Blockade on Flow-Induced Neointimal Formation in Endothelialized Baboon Vascular Grafts, 779

Fluid Shear Stress Induces Lipocalin-Type Prostaglandin D₂ Synthase Expression in Vascular Endothelial Cells, 967

Immunoneutralization of Glycoprotein Ib α Attenuates Endotoxin-Induced Interactions of Platelets and Leukocytes With Rat Vascular Endothelium In Vivo, 1031

Mechanisms for Regulation of Fluid Shear Stress Response in Circulating Leukocytes, e13

Shortening velocity

2-Deoxy-ATP Enhances Contractility of Rat Cardiac Muscle, 1211

Signal transduction

Contribution of Caveolin Protein Abundance to Augmented Nitric Oxide Signaling in Conscious Dogs With Pacing-Induced Heart Failure, 1085

Role of p38 Mitogen-Activated Protein Kinases in Preconditioning: A Detrimental Factor or a Protective Kinase?, 921

Roles of Mitogen-Activated Protein Kinases and Protein Kinase C in α_{1A} -Adrenoceptor-Mediated Stimulation of the Sarcolemmal Na⁺-H⁺ Exchanger, 214

Small Guanine Nucleotide-Binding Proteins and Myocardial Hypertrophy, 1019

Toward Antiapoptosis as a New Treatment Modality, 371

Transgenic Overexpression of Constitutively Active Protein Kinase C ϵ Causes Concentric Cardiac Hypertrophy, 1218

Signaling

Ischemic Preconditioning in Isolated Cells, 926

Mechanical Stress-Induced Heat Shock Protein 70 Expression in Vascular Smooth Muscle Cells Is Regulated by Rac and Ras Small G Proteins but Not Mitogen-Activated Protein Kinases, 1122

Smoking

Tetrahydrobiopterin Improves Endothelium-Dependent Vasodilation in Chronic Smokers: Evidence for a Dysfunctional Nitric Oxide Synthase, e36

Smooth muscle

Incidence of Myoendothelial Gap Junctions in the Proximal and Distal Mesenteric Arteries of the Rat Is Suggestive of a Role in Endothelium-Derived Hyperpolarizing Factor-Mediated Responses, 341

Myoendothelial Gap Junctions: The Gap Is There, but Does EDHF Go Through It?, 249

Stressing Rac, Ras, and Downstream Heat Shock Protein 70, 1101

Smooth muscle α -actin

Smooth Muscle α -Actin CArG Elements Coordinate Formation of a Smooth Muscle Cell-Selective, Serum Response Factor-Containing Activation Complex, 221

Smooth muscle cells

Effect of Platelet-Derived Growth Factor Receptor- α and - β Blockade on Flow-Induced Neointimal Formation in Endothelialized Baboon Vascular Grafts, 779

Local Expression of Bovine Decorin by Cell-Mediated Gene Transfer Reduces Neointimal Formation After Balloon Injury in Rats, 676

Loss of Expression of the β Subunit of Soluble Guanylyl Cyclase Prevents Nitric Oxide-Mediated Inhibition of DNA Synthesis in Smooth Muscle Cells of Old Rats, 520

Mechanical Stress-Induced Heat Shock Protein 70 Expression in Vascular Smooth Muscle Cells Is Regulated by Rac and Ras Small G Proteins but Not Mitogen-Activated Protein Kinases, 1122

Smooth muscle contraction

Asynchronous Ca²⁺ Waves in Intact Venous Smooth Muscle, e72

Sodium

Atrial Natriuretic Factor Binding to Its Receptor Is Dependent on Chloride Concentration: A Possible Feedback-Control Mechanism in Renal Salt Regulation, 1135

Hyperaldosteronemia in Rabbits Inhibits the Cardiac Sarcolemmal Na⁺-K⁺ Pump, 37

Soluble guanylyl cyclase

Loss of Expression of the β Subunit of Soluble Guanylyl Cyclase Prevents Nitric Oxide-Mediated Inhibition of DNA Synthesis in Smooth Muscle Cells of Old Rats, 520

Spin resonance

Effects of Long-Term Nitroglycerin Treatment on Endothelial Nitric Oxide Synthase (NOS III) Gene Expression, NOS III-Mediated Superoxide Production, and Vascular NO Bioavailability, e7

Spirolactone

Hyperaldosteronemia in Rabbits Inhibits the Cardiac Sarcolemmal Na⁺-K⁺ Pump, 37

Sprouting

Angiopoietin-1 Induces Endothelial Cell Sprouting Through the Activation of Focal Adhesion Kinase and Plasmin Secretion, 952

Stress-activated protein kinase

- Activation of Mitogen-Activated Protein Kinases in Human Heart During Cardiopulmonary Bypass, 1004
- Stressing Rac, Ras, and Downstream Heat Shock Protein 70, 1101

Stress fibers

- Lateral Zone of Cell-Cell Adhesion as the Major Fluid Shear Stress-Related Signal Transduction Site, 425

Stromal cell-derived factor-1

- The Stromal Cell-Derived Factor-1 Chemokine Is a Potent Platelet Agonist Highly Expressed in Atherosclerotic Plaques, 131

Structural remodeling

- Electrophysiological Effects of Remodeling Cardiac Gap Junctions and Cell Size: Experimental and Model Studies of Normal Cardiac Growth, 302

Structure

- Increased Expression of Cytoskeletal, Linkage, and Extracellular Proteins in Failing Human Myocardium, 846

 β Subunit

- Ca^{2+} Channel Modulation by Recombinant Auxiliary β Subunits Expressed in Young Adult Heart Cells, 175

Sudden death

- Enhanced Dispersion of Repolarization and Refractoriness in Transgenic Mouse Hearts Promotes Reentrant Ventricular Tachycardia, 396

Superoxide

- NAD(P)H Oxidase: Role in Cardiovascular Biology and Disease, 494
- Vascular Superoxide Production by NAD(P)H Oxidase: Association With Endothelial Dysfunction and Clinical Risk Factors, e85

Superoxide anion

- Coronary Microvascular Endothelial Cell Redox State in Left Ventricular Hypertrophy: The Role of Angiotensin II, 463

Superoxide dismutase

- Transcriptional and Posttranscriptional Regulation of Endothelial Nitric Oxide Synthase Expression by Hydrogen Peroxide, 347

Sympathetic nervous system

- β -Adrenergic Receptor Signaling: An Acute Compensatory Adjustment---Inappropriate for the Chronic Stress of Heart Failure? Insights from $G_{s\alpha}$ Overexpression and Other Genetically Engineered Animal Models, 502
- Determinants of the Cardiomyopathic Phenotype in Chimeric Mice Overexpressing Cardiac $G_{s\alpha}$, 802
- Reduced Myocardial Nerve Growth Factor Expression in Human and Experimental Heart Failure, e80

Systemic vasculature

- Downregulation of Endothelial Nitric Oxide Synthase in Rat Aorta After Prolonged Hypoxia In Vivo, 671

T**T lymphocytes**

- Postanoxic T Lymphocyte-Endothelial Cell Interactions Induce Tumor Necrosis Factor- α Production and Neutrophil Adhesion: Role of Very Late Antigen-4/Vascular Cell Adhesion Molecule-1, 1237
- T-Lymphocyte-Derived Tumor Necrosis Factor Exacerbates Anoxia-Reoxygenation-Induced Neutrophil-Endothelial Cell Adhesion, 205

T-type Ca^{2+} currents

- T-Type and Tetrodotoxin-Sensitive Ca^{2+} Currents Coexist in Guinea Pig Ventricular Myocytes and Are Both Blocked by Mibefradil, 628

T-type channel

- A Tale of Two (Calcium) Channels, 613

Tachycardia

- A Mechanism of Transition From Ventricular Fibrillation to Tachycardia: Effect of Calcium Channel Blockade on the Dynamics of Rotating Waves, 684

TCTG(G/C) direct repeat

- Identification of *cis* Elements in the Cardiac Troponin T Gene Conferring Specific Expression in Cardiac Muscle of Transgenic Mice, 478

Tetrahydrobiopterin

- Tetrahydrobiopterin Improves Endothelium-Dependent Vasodilation in Chronic Smokers: Evidence for a Dysfunctional Nitric Oxide Synthase, e36

Tetrahydrobiopterin

- Folic Acid Reverts Dysfunction of Endothelial Nitric Oxide Synthase, 1129

- Tetrahydrobiopterin Improves Endothelium-Dependent Vasodilation in Chronic Smokers: Evidence for a Dysfunctional Nitric Oxide Synthase, e36

Tetrodotoxin-sensitive Ca^{2+} currents

- T-Type and Tetrodotoxin-Sensitive Ca^{2+} Currents Coexist in Guinea Pig Ventricular Myocytes and Are Both Blocked by Mibefradil, 628

Therapy

- Toward Antiapoptosis as a New Treatment Modality, 371

Three-dimensional reconstruction

- Incidence of Myoendothelial Gap Junctions in the Proximal and Distal Mesenteric Arteries of the Rat Is Suggestive of a Role in Endothelium-Derived Hyperpolarizing Factor-Mediated Responses, 341

Thrombin

- Signaling Properties and Functions of Two Distinct Cardiomyocyte Protease-Activated Receptors, 1054

Thyroid hormone resistance

- Cardiac Dysfunction Caused by Myocardium-Specific Expression of a Mutant Thyroid Hormone Receptor, 700

Tissue remodeling

- Altered Patterns of Gene Expression in Response to Myocardial Infarction, 939

Titin

- Series of Exon-Skipping Events in the Elastic Spring Region of Titin as the Structural Basis for Myofibrillar Elastic Diversity, 1114

Transcription

- Interferon- γ Induces AT_2 Receptor Expression in Fibroblasts by Jak/STAT Pathway and Interferon Regulatory Factor-1, 233
- Nuclear Factor- κB and cAMP Response Element Binding Protein Mediate Opposite Transcriptional Effects on the Flk-1/KDR Gene Promoter, e110

Transgenesis

- Enhanced Cardiac Function in Transgenic Mice Expressing a Ca^{2+} -Stimulated Adenylyl Cyclase, 795

Treatment

- Apoptosis and Heart Failure: A Critical Review of the Literature, 1107

Triage process

- Under New Management: A Six-Month Progress Report on *Circulation Research*, 111

Triglycerides

- Direct Visualization of Lipid Deposition and Reverse Lipid Transport in a Perfused Artery: Roles of VLDL and HDL, 768

Trimetazidine

- The Antianginal Drug Trimetazidine Shifts Cardiac Energy Metabolism From Fatty Acid Oxidation to Glucose Oxidation by Inhibiting Mitochondrial Long-Chain 3-Ketoacyl Coenzyme A Thiolase, 580

Troponin I

- Chimera Analysis of Troponin I Domains That Influence Ca^{2+} -Activated Myofilament Tension in Adult Cardiac Myocytes, 470

Troponin T

- Investigation of a Truncated Cardiac Troponin T That Causes Familial Hypertrophic Cardiomyopathy: Ca^{2+} Regulatory Properties of Reconstituted Thin Filaments Depend on the Ratio of Mutant to Wild-Type Protein, 1146

Tubuloglomerular feedback

- Relation Between Renal Interstitial ATP Concentrations and Autoregulation-Mediated Changes in Renal Vascular Resistance, 656

Tumor necrosis factor- α

- Cellular and Molecular Dissection of Reperfusion Injury: ROS Within and Without, 117
- Cyclooxygenase-2 Is Required for Tumor Necrosis Factor- α - and Angiotensin II-Mediated Proliferation of Vascular Smooth Muscle Cells, 906
- Interleukin-1 β and Tumor Necrosis Factor- α Decrease Collagen Synthesis and Increase Matrix Metalloproteinase Activity in Cardiac Fibroblasts In Vitro, 1259
- Postanoxic T Lymphocyte-Endothelial Cell Interactions Induce Tumor Necrosis Factor- α Production and Neutrophil Adhesion:

- Role of Very Late Antigen-4/Vascular Cell Adhesion Molecule-1, 1237
- T-Lymphocyte-Derived Tumor Necrosis Factor Exacerbates Anoxia-Reoxygenation-Induced Neutrophil-Endothelial Cell Adhesion, 205
- Tumor suppressor**
- Enhanced Cardiomyocyte DNA Synthesis During Myocardial Hypertrophy in Mice Expressing a Modified TSC2 Transgene, 1069
- Type A receptors**
